
Client Meeting 3

Erin Loehr, Mike Bastian, Ben Rose

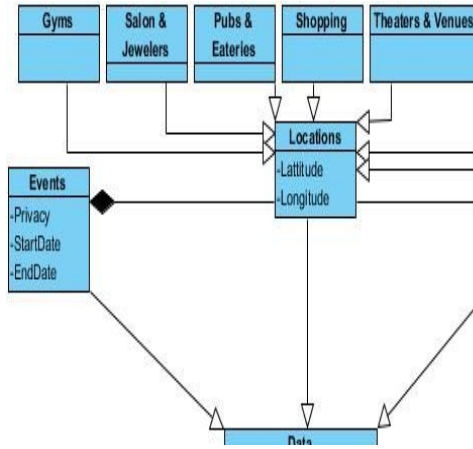

The Meeting

- Took place November 28th at 10:30am
 - Always meet in Kyles on campus office
-

How was it?

- Much more fruitful than the last
 - Many more things to show Kyle
 - Much needed feedback on a lot of our work so far
 - Mike was the notetaker
-

Important Moments

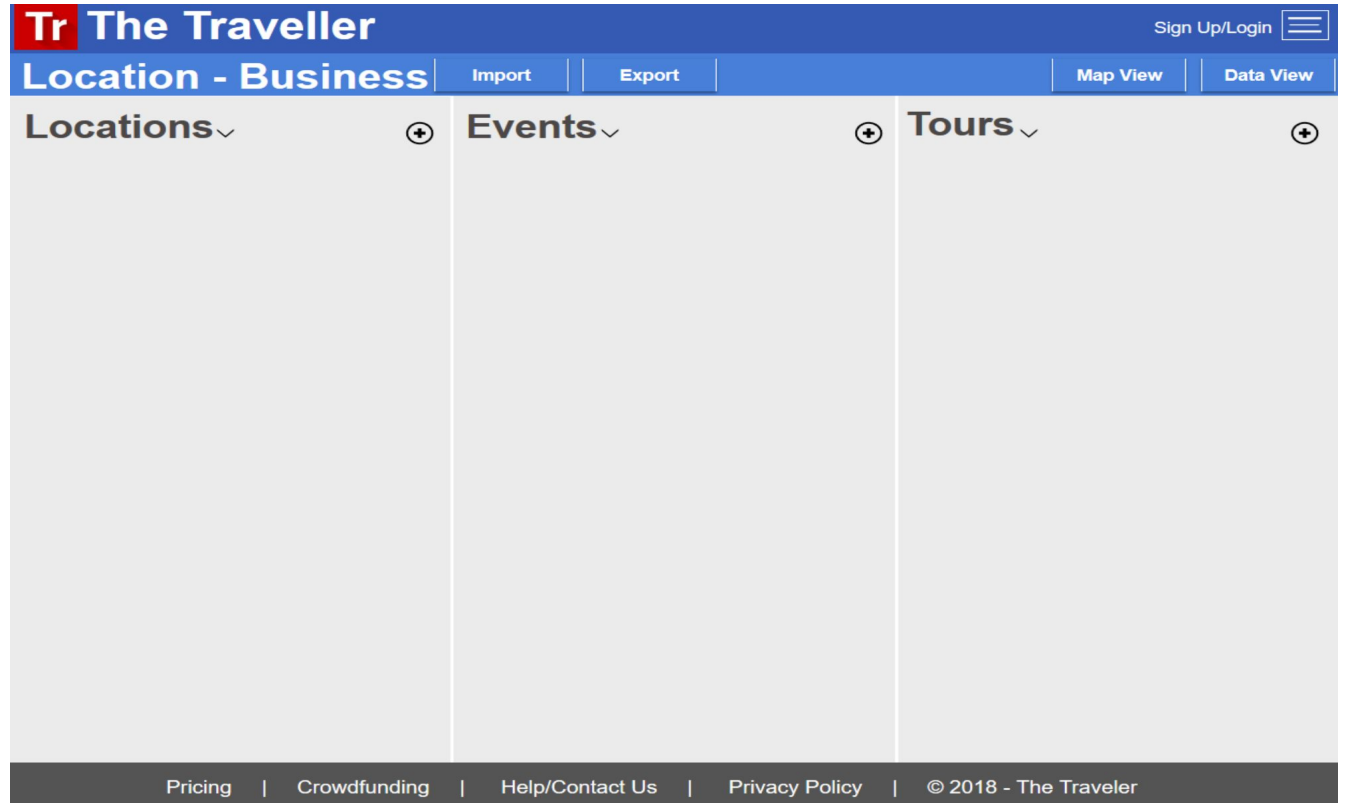

- Locations would be better called places
 - This is because there are instances where a place will have a different location(usually events)
 - Kyle Mentioned a search feature would be nice
 - Kyle said he would send us more documents pertaining to the database
 - He also confirmed our tech stack was setup correctly
-

Observations

- Quick and clear
 - Prototype and UML shown
 - Kyle enjoyed what we had so far
 - Pushing more towards programming
 - Talked about small UI details
 - Specific programs he wants us to use
 - Gathering more information from Kyle
-

Clarification & Further Questions

- Structure and organization of the software
 - Model - View - Controller
 - Items → Organization
 - Default Place vs. Temporary Places
- More direction for the design of the website
 - Each section with their own page, partly dedicated editing
 - Search feature
 - Only places shown on Map View not tours
 - Drop down box for category filter (Alphabetical)
- Currently, there are no further questions
 - More will come about with further progression, particularly with structure as Kyle is very particular
